SCHALK- NUTZTIERE GMBH

INTERNATIONAL EXPERIENCE
PROVEN RELIABILITY
BEST CUSTOMER SERVICE

You have the choice! Select your animals either from the farm of origin, the quarantine station or from auction sales. Austria with its neighbouring regions is the main supplier for Fleckvieh/Simmental and Braunvieh cattle. Holstein is mainly found in the South of our country. All is perfectly organised and assisted by our specialists for livestock, trade, logistics and import procedures. Selection can be done by customers or on trust purchase. We will be happy to provide door-to-door service.

Internationally recognized health standards

All animals are in the best of health and are very robust. They comply with all requirements regarding international zooveterinarian standards. We strive to provide you with healthy and productive animals to ensure best productivity and profitability. All animals are free of Tbc, Brucellosis, Leucosis, BVD, IBR/IPV and fulfill all your demands.

FLECKVIEH-SIMMENTAL

Outstanding dual purpose breed with high capacity to produce milk and beef in one animal. Main breeding areas are Austria, Southern Germany and the neighbouring alpine regions. Adapts easily to different management and feeding conditions. Second biggest dairy breed in the world with growing population on the whole globe thanks to outstanding features:

- typical dual-purpose breed for milk and beef
- milk production from 7500kg - 11 000kg per lactation according to feeding intensity and management
- low somatic cell count
- high solids (4,15% F, 3,46 % P)
- robust, fertile with good longevity, short intercalving period
- suitable for big modern loose housing system, pasture and attached stable systems in small holdings
- heat and cold tolerant
- high carcasse weights up to 500 kg with bulls and up to 400 kg with cows
- high prices for bull calves
- daily gain of bulls in feedlots approx. 1300 g, carcasse 57-58%
- easy calving and exceptional good maternal instinct

HOLSTEIN

Holstein is the Number-one dairy breed in many parts of the world. Thanks to our connections we can assure a good availability of animals.

- high production from 8000 to 12.000 litres per lactation
- early maturing
- for big herds with good farm management and high feeding capacity
- also Red Holsteins available

BROWN SWISS

Traditional dairy breed with dual purpose features for high capacity to produce milk. Main breeding areas are the alpine regions. Adapts easily to different management and feeding conditions.

- High milk production from 7.500kg - 10.000 kg per lactation
- Low somatic cell count and good udder health
- high solids (4,15% F, 3,47% P)
- high longevity
- good feet and legs
- heat tolerant

BEEF BREEDS

On request we will be happy to provide you with beef breeds like Angus, Limousin, Charolais or from Austria or partner countries.

COMMERCIAL TYPE CATTLE

We export big numbers of commercial cattle from the above mentioned breeds from following categories:

- calves (from 70 kg upwards) male/female
- weaners (from 200 kg upwards) m/f
- yearlings m/f
- heifers / bulls
- feeding and slaughter cows
